Looking Forward in 2022

This year is about determination. While our commitment to ending hunger, poverty and malnutrition remains steadfast, we know our work today has to empower families to withstand the challenges of tomorrow. Bolstered by a decade of experience and success, Feed the Future is driving impact and lasting progress towards a food secure world for all.
2021 was a big year.

Feed the Future doubled down on our work to build a future that is more prosperous, stable and secure for all:

- At the UN Food Systems Summit, President Biden committed $10 billion for global hunger efforts at home and abroad so that we can sustainably feed the world for decades to come.

- The U.S. government updated and enhanced the Global Food Security Strategy which guides our work.

- The President’s Emergency Plan for Adaptation and Resilience (PREPARE) launched at COP26 to support more than half a billion people adapt to and manage the impacts of climate change.

- USAID Administrator Power, on behalf of the U.S. government, announced plans to invest $11 billion to combat global malnutrition at the Tokyo Nutrition for Growth Summit.

Along the way, we are inspired by the stories of resilience and people around the world leading local, inclusive solutions and emerging stronger. Together with our partners, we’re leveraging research and innovation to equip communities with the resources to thrive. This year is fresh with possibilities. As we press onwards, we are determined to forge a better future.

White House Appoints New BIFAD Members

President Biden appointed new members to the Board for International Food and Agricultural Development (BIFAD), chaired for the first time by a leader from a historically black college and university (HBCU). We’re excited to welcome these new thought leaders and leverage their expertise in the fight to
USAID Signs Historic MOU with Tuskegee University

Feed the Future Global Coordinator and USAID Administrator Samantha Power signed the next memorandum of understanding under USAID’s Minority Serving Institutions Partnership Initiative. In support of Feed the Future, USAID and Tuskegee University are working together to advance research on food safety and security, farming and extension, animal health and pathology, and human health and welfare.

Partnerships like this one expand access to opportunities for Historically Black Colleges and Universities (HBCUs) to connect their research and expertise to global efforts to end hunger, poverty, and malnutrition.
