

# FEED THE FUTURE

The U.S. Government's Global Hunger & Food Security Initiative

## Building Resilient Communities for Lasting Progress

When families, communities and countries are resilient, they can better cope and even thrive during hard times. Feed the Future builds resilience in areas where economic, conflict and weather-related shocks often recur.

We do so by strengthening and diversifying sources of income for vulnerable populations; managing risk through insurance and better access to financial services; using early warning information to better prepare for foreseeable

shocks and stresses; improving natural resource management; diversifying diets for better nutrition; [and more](#) .

By empowering families and communities with the tools and resources they need to stand strong amid shocks and stresses, Feed the Future is helping build [lasting food security and nutrition](#) for future generations.

[Studies have shown](#) this not only saves lives and livelihoods, but is also cost-effective. By investing in long-term solutions today, we can reduce the need for costly humanitarian assistance in the future and help countries protect progress and advance toward self-reliance.

## Feed the Future in Action

[Aberu's Savings Plan](#)

With diversified income, access to loans and savings for the future, Aberu is prepared to withstand the effects of drought in Ethiopia.

### Beating the Heat By Planting Early in Bangladesh

Farmers in Bangladesh escape the risk of heat stress with new planting strategies.

### Women Overcome Drought with Diversification

This women's group in Zambia is diversifying its crop production to earn more, even during droughts.

### A Mother's Journey to Self-Reliance

With more skills and knowledge, Alimata has become a community leader, a successful producer and an entrepreneur.

### Scaling Up Insurance to Withstand Adversity in Kenya

Feed the Future expands livestock insurance to help pastoralists in Northern Kenya manage risk and improve community resilience.

## Partner Stories

### HEALTHY ANIMALS MEAN HAPPINESS IN RURAL NIGER

Meet Boubacar Gado, a veterinarian who treats animals in rural Niger to help families earn more income.

### PROMOTING RECOVERY AND RESILIENCE DURING CONFLICT IN COLOMBIA

Synergies between economic, psychological and social assets can facilitate recovery and resilience.

### PROTECTING SMALL FARMS IN MOZAMBIQUE FROM DROUGHT

The University of California, Davis brings U.S. ingenuity to bear to help farmers in Mozambique overcome challenges.

### BUILDING LOCAL CAPACITY TO PROTECT WATER RESOURCES IN TANZANIA

Partnership with local governments is strengthening Tanzania's water resource management at all levels.

### NETHOUSES ARE HELPING CAMBODIAN FARMERS TRANSFORM THEIR FOOD SYSTEM

Vegetable farmers work with U.S. university researchers in Cambodia to grow crops inside nethouses for better harvests.

### UNFORGOTTEN IN THE CENTRAL AFRICAN REPUBLIC

USAID supports vulnerable populations in the Central African Republic by helping meet their basic needs during crisis.

## Upcoming Events

Global Entrepreneurship Summit

June 3-5, 2019

ICT4Ag Conference

June 5, 2019

The Hague, Netherlands

Washington, D.C.
